indica

**Rainbow Runtz x Strawberry Shortcake**

## Hemp-derived Delta-9 THC

Hemp-derived Delta-9 THC refers to Delta-9 tetrahydrocannabinol, a psychoactive compound found in the cannabis plant, specifically in hemp. Delta-9 THC is one of the many cannabinoids present in cannabis, and it's known for its psychoactive effects, which are responsible for the "high" associated with use.

## Liquid Diamonds

Liquid Diamonds are known for their high potency due to the concentrated levels of cannabinoids, as well as the richness of aromatic terpenes preserved through the extraction process that separates cannabinoids and terpenes.

## Live Badder

Live Badder, also known as live batter or simply "Badder," is a type of cannabis concentrate. It falls under the category of "cannabis extracts" and is known for its unique texture and high potency.

## THC-P

THC-P, or  $\Delta^9$ -tetrahydrocannabiphorol, is a cannabinoid suggested to have a 33x higher affinity for cannabinoid receptors, potentially leading to stronger effects at lower doses compared to THC. As well as extended duration of effect.

## THC-A

THC-A, or tetrahydrocannabinolic acid, is a precursor to THC (tetrahydrocannabinol), the psychoactive compound found in cannabis.
